If you don't have PowerPoint at home, take a look at Google Slides or Canva.

Key Facts

PowerPoint is one type of presentation software. Presentation software is used to create slideshows which are used to get a message across to an audience.

Using hyperlinks to link pages means that the presenter can move between the pages they need more easily. It's also useful for quizzes.

Transition and animation tools allow the presenter to draw attention and add interest to important information

PowerPoint is not the only presentation software. Others include Google Slides, Canva and Keynote.

Questions to deepen your learning...

Character	Critical Thinking	Creativity	Communication	Citizenship	Collaboration
How can we make sure that our PowerPoint is useful for our audience?	Adding animations to my presentation will always make my presentation better. Do you agree?	How could you make sure that your presentation stands out from others?	How can we present this in a way that a younger child will understand?	If we are using weblinks in our presentation, what do we need to be careful about?	What skills can you bring to this presentation. How can you make sure your partner's voice is heard as well?

Teacher Assessment

Learning Objective	Working Towards	At Expected	Above Expected
Is my presentation suitable for its audience?			
Have I used transitions and animations effectively.			
Have I combined text and images in my presentation.			
Have I included a hyperlink to another page or website?			

Self Assessment

What went well...	Even better if...
